EXAMINER'S COMMENTS, EXAMINER'S AMENDMENT AND REASONS FOR ALLOWANCE

Preliminary Amendment Submitted January 23, 2004

1. It noted that in the preliminary amendment submitted January 23, 2004, the first

preliminary amendment directed to the claims, claims 13, 16, 19 and 22 are labeled as

"Currently Amended" while claims 14, 15, 17, 18, 20, 21, 23 and 24 are labeled as

"Previously Presented" and claims 25 to 32 are labeled as "New". However, none of

claims 13 to 24 had appeared in the application prior to this preliminary amendment.

Accordingly, all of the claims appearing in this preliminary amendment, claims 13 to 32

should have been labeled as "New". The Examiner has acted on this case with this

understanding. If this is not satisfactory to the applicants, the applicants should notify

the Examiner.

Examiner's Amendment

2. An examiner's amendment to the record appears below. Should the changes

and/or additions be unacceptable to applicant, an amendment may be filed as provided

by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be

submitted no later than the payment of the issue fee.

Art Unit: 1742

Authorization for this examiner's amendment was given in a telephone interview with Mr. Peter Skiff on December 19, 2005.

The application has been amended as follows:

I. In claims 14, line 1, "1" has been deleted and –13—has been inserted.

II. In claims 15, line 1, "1" has been deleted and –13—has been inserted.

III. In claims 17, line 1, "4" has been deleted and -16—has been inserted.

IV. In claims 18, line 1, "4" has been deleted and -16—has been inserted.

V. In claims 20, line 1, "7" has been deleted and –19—has been inserted.

VI. In claims 21, line 1, "7" has been deleted and –19—has been inserted.

## **Reasons for Allowance**

- 3. The following is an examiner's statement of reasons for allowance: None of the references alone or in combination teach or suggest a method of heat treating a Ni-base alloy tube:
  - i) at a temperature of 650 to 1200°C;
  - ii) for 1 to 1200 minutes'
  - iii) in a supplied atmosphere consisting of hydrogen or a mixed gas of hydrogen and argon having a dew point of –60°C to +20°C; wherein
  - iv) prior to putting the tube into the continuous heat treatment furnace, the atmospheric gas is supplied into the tube from the front end of the tube moving direction by use of a gas supplying devices.

Art Unit: 1742

It is noted that Anada et al. (Anada '528, US Patent 6,482,528, cited in the IDS submitted October 9, 2003) and JP 2002-121630 (Anada '630, cited in the IDS submitted October 9, 2003) each teach heat treating a Ni-base alloy tube:

- i) at a temperature of 650 to 1200°C;
- ii) for 1 to 1200 minutes'
- iii) in a supplied atmosphere consisting of hydrogen or a mixed gas of hydrogen and argon having a dew point of -60°C to +20°C.

However, neither Anada '528 nor Anada '630 nor any of the prior art references alone or in combination teach or suggest the additional process step of;

iv) prior to putting the tube into the continuous heat treatment furnace, the atmospheric gas is supplied into the tube from the front end of the tube moving direction by use of a gas supplying devices; in combination with i) – iii) nor the unexpected improved results, i.e., the reduction in the amount of Ni released from the nickel tubes resulting from a combination of i) – iv) as demonstrated in Table 2 of the specification.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

## Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to John P. Sheehan whose telephone number is (571)

Art Unit: 1742

272-1249. The examiner can normally be reached on T-F (6:45-4:30) Second Monday Off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Roy King can be reached on (571) 272-1244. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
